Karur, Tamil Nadu

Professional Summary

Aspiring Software Developer with a strong foundation in Java Full Stack Development and a passion for building scalable, user-friendly applications. Eager to apply technical skills, learn continuously, and contribute to innovative software solutions.

Education

B.E. Electronics and Communication Engineering (2023-2027)
M Kumarasamy College of Engineering, Karur.
CGPA - 6.9

Higher Secondary Education (2022–2023)
Bharani Park Matriculation Higher Secondary School, Karur.
Percentage: 67%

Skill Set

Technical Skills: Java, HTML, CSS, JavaScript, MySQL

Tools & Technologies: MongoDB, Bootstrap, VS Code, Cursor AI, Firebase

Soft Skills:

- Strong Problem-Solving Skills
- Effective Communication & Team Collaboration
- Leadership & Team Management
- Adaptability and Continuous Learning
- Time Management and Organizational Skills

Certifications

Full Stack Development Intern | NetGene Technologies (June 2026)

- Developed and enhanced full-stack web applications.
- Worked with front-end and back-end development concepts.
- Participated in application testing and debugging.
- Applied software development best practices in project assignments.

Certified in Junior Level typing (2023)

Project

1. Orphanage management system

Developed a Full Stack Orphanage Management System using Spring Boot and React. Utilized Hibernate/JPA for secure and efficient orphan and donor record management, improving administrative workflow efficiency.

Role: Full Stack Developer

2. Attendance Maintenance System

Developed an AI-powered Attendance System using Java, Spring Boot, React, ESP32, and Firebase, enabling biometric authentication, real-time synchronization, and RESTful API integration.

Role: Full Stack Developer

3. Sleep disorder detection

I built a web-based Sleep Disorder Detection System using React and Flask that analyzes user health and lifestyle data with machine learning models to predict sleep apnea risk and provide basic lifestyle recommendations.

Role : Full Stack Developer

4. Bus booking System

Architected a **Full Stack Java** Trip Management System using **Spring Boot** and **React**. Developed RESTful APIs for real-time scheduling and booking control, leveraging **Hibernate/JPA** for efficient expense data management and secure user authentication.

Role : Full Stack Developer
